

IT-PROJECT SCOPE FORM

Project Title : “ENTRY AND EXIT MANAGEMENT FOR IIITB”

Project Number : 3

Project Leader/Manager : Srujan Swaroop

Anticipated Project Start Date : 20/08/2018

Sponsor : ADMIN

Date Prepared : 22/08/2018

Project Risk Level :

Estimated Completion Date : 30/10/2018

Team Members :

Srujan(Team leader)

S1(I.T)

S2(Developer 1)

S3(Developer 2)

Purpose Of Project :

- >To keep track of entry and exit of students ,professors,working staff.
- > To restrict the entry of outside personnel without proper details.
- >To keep track of visitors in and out.
- >To store entry and exit records easily.
- >To search a record of a student which can be done easily using database.

Background :

- > Now every entry or exit has to be written in a book which is a lot of work.
- > Not able to restrict unwanted entries of outsiders .
- >A lot of students return to college at late night and there is no efficient way to keep track of them.
- >To check whether a person was in the campus or not in case of emergency situation.

Deliverables :

- > An application to keep track of in and out time of a person;

- >A well defined database to maintain these records.
- >restricted entry so that outsiders cannot enter without proper details.
- >Detailed records of inflow and outflow.

Stakeholders :

- >Admin.
- >Srujan ,S1,S2,S3.
- >IIITB staff,administration.
- >Students.

Resource Requirements :

- >A database server.
- > An completely functional application maintaining database.
- >Laptop
- > security personnel to scan details.
- >Money (salary for security,for maintaining server).
- >Hardware like barcode scanner to scan ID cards.
